CHARLOTTETOWN, Prince Edward Island, Sept. 30, 2015 /PRNewswire/ -- A new motorcycle manufacturer, Havoc Motorcycles (havoc-motorcycles.com), has announced its launch, releasing details of its line-up of heavyweight motorcycles to be available for the 2016 model year.

The flagship model, "Iron Flight: Mike Tyson Special Edition," is a special edition produced under trademark license from iconic boxer and entertainer Mike Tyson. It features a 124 ci engine, and Mike Tyson's iconic tattoo incorporated into an airbrushed paint scheme, with matching machined wheels and accessories.

Iron Flight: Mike Tyson Special Edition

Havoc Motorcycles Badge

Displaying the first "Iron Flight" motorcycle to a packed house in Charlottetown, President of Havoc Motorcycles, Dr Jarrod Wiener, said, "We are passionately committed to making motorcycles that enable riders to symbolize their individuality, the source of their strength and freedom. We're thrilled to be working with Mike Tyson and look forward to introducing riders to the Havoc Motorcycles lineup."

Havoc motorcycles will offer three models initially, all of the heavyweight cruiser type. All feature large displacement engines (113ci to 124ci). Each motorcycle is hand-crafted, featuring sculpted and molded bodywork of the 'custom bagger' style to offer enthusiasts a custom-inspired motorcycle right from the assembly floor.

"We've all bought new motorcycles. On the sales floor, it's the best machine available. Then you get it home, and the huge accessories catalog comes in the mail to improve it. You can rebuild the whole bike and still park it next to a nearly identical motorcycle in a parking lot. We build your Havoc Motorcycle the way you want it from the get-go," says Wiener.

Customers can personalize their motorcycles with a wide range of options from the factory, including a choice of wheels, billet accessories, powder-coating, anodizing, and paint finishes. Customers can even work with Havoc Motorcycles' graphic designers and airbrush artists for a truly personal expression.

The Iron Flight: Mike Tyson Special Edition is the top-of-the-line Havoc Motorcycle. With a 124ci engine, and Mike Tyson's legendary imagery airbrushed by hand, Iron Flight makes a statement of power and presence loud and clear. "Havoc is presence," says Wiener. "It's a no-nonsense statement of strength and individuality. What says that clearer than riding a Mike Tyson Special Edition."

Havoc Motorcycles, online at [havoc-motorcycles.com](http://havoc-motorcycles.com), is currently establishing a dealer network across North America and invites enquiries from power-sports dealers in Canada and the United States.
